Harbor Freight Tools occupies the converted multi-tenant building at West Central Plaza in Albuquerque.

**Albuquerque, N.M.** — Heslin Holdings has completed the redevelopment of West Central Plaza, a retail center located at 4208 Central Ave. SW in Albuquerque. Retailers at the property are now open for business. The company originally acquired the 150,000-square-foot retail center in 2015 with a large, vacant, single-tenant space. The multimillion-dollar renovation included the division of the largest freestanding building at the property, formerly occupied by Kmart, into two anchor tenant spaces now occupied by Burlington and Conn's Home Plus. Heslin Holdings also added 17,000 square feet of floor space adjacent to Burlington. Dollar Tree now occupies a portion of the new space. Additionally, the redevelopment included the conversion of a multi-shop building at the southwest portion of the property into a single-tenant facility, which Harbor Freight Tools now occupies. A multi-tenant drive-thru pad site was also constructed on the corner of Artisco Drive SW and Central Avenue. Panda Express and T-Mobile are tenants at the pad site. Dunkin' Donuts is also constructing a new pad building in the shopping center along Central Avenue.
